AFRICA AFRICA
PHARMA EXPO LAB EXPO
OnLine Exhibition • 2-3-4 March, 2021

With our first participation at fully digital international Exhibition, we acknowledge with thanks to everyone –visitors, industry professionals, colleagues, and partners who made our participation a pioneering event and a truly special one. We would like to thank the Organizing Committee of AFRICA PHARMA EXPO 2021 - OnLine Exhibition..!

With almost more than 100 visitors, we were delighted that we have managed to move into a new dimension for sharing quality content and display our product digitally to the target audience.

As always, the current pandemic is all about adapting and innovating – and having redesigned the agenda from the ground up to ensure we could bring the most pressing industry topics to the table.

While all the events always generally target regions, we felt that in given the current situation, that it was time to bring the global industry together to talk solutions, which is exactly what we achieved.

A special thanks also goes to all fantastic Speakers and Exhibitors who had made informative presentations on technologies and exhibited at their Digital Booths nicely, as well. We are proud to be one of the participants in this OnLine edition of AFRICA PHARMA EXPO 2021.!

Mechmaark Filtech India Pvt Ltd

The OnLine platform of the 5th AFRICA PHARMA EXPO 2021 was an excellent experience to understand, learn and adopt the novel way to business combining with the technologies.!

Claudia Puttini
Borgo Costruzioni Meccaniche SRL

Many congratulations for organizing the AFRICA PHARMA EXPO 2021 / AFRICA LAB EXPO 2021 - OnLine Exhibition very professionally. I must appreciate for the immediate support offered, when needed.

It was my first experience with a OnLine Exhibition and the great thing is, it makes possible to get in touch with customers and / or industry business people. I assume that this kind of OnLine opportunities will remain also after the pandemic, as it gives a broader audience the possibility to receive the latest news on science and technologies on their particular industries. I am missing the socializing and meeting people in-person, what's a part of being human, but nevertheless it is a professional commitment to reduce the environmental impact these days.

Waters, as the industry leader in specialty measurement, we share a common mission with our customers to improve people's lives around the world, and our sustainability efforts are just some of the ways we achieve this mission.

Andrea Hofmann
